

FaceTime

Over Wi-Fi, you can use FaceTime on any of these devices:

- iPhone 4 or later;
- iPad 2 or later;
- iPad mini (all models);
- iPod touch 4th generation or later (only iPod touch 5th generation supports FaceTime audio calling).

With a mobile data plan, you can also use FaceTime without Wi-Fi on any of these devices:

- iPhone 4s or later;
- iPad (3rd generation or later).

Turn on FaceTime

Open your FaceTime app and sign in with your Apple ID (you can also do this from Settings > FaceTime).

If you're using an iPhone, FaceTime automatically registers your phone number. To also register your email address on your iPhone, tap Settings > FaceTime > Use your Apple ID for FaceTime, and sign in. If you're using an iPad or iPod touch, register your email address by tapping Settings > FaceTime > Use your Apple ID for FaceTime, and sign in.

Make a FaceTime call

To make a FaceTime call, you need the person's phone number or registered email address. There are a few ways to make a FaceTime call:

- In the FaceTime app, enter the person's phone number or email address then tap the FaceTime video  or audio  icon.
- If you have the person's phone number or email address saved in your Contacts, you can enter their name, then tap the video or audio icon;
- You can also begin a FaceTime video call from your iPhone during a call. Tap the FaceTime icon during the phone call to talk using FaceTime.
